

VEDIC YAGYAS, PRAYERS (To remove ages old problems of mankind)

What is YAGYA?

YAGYA is most important part of life. There are many ways to perform YAGYAS for an individual or for a family. When we realise we have to achieve some thing in life and we want to concentrate on the point of achievements it is YAGYA. Just like a student studying in the class learning many things and grasping. As he feel the importance of the study and starts his own study. It is a concentration. He wants to keep some thing by heart. It is all a part of YAGYA. YAGYA means: sacrifice, surrender Meditation, self-purification, gaining knowledge, freedom from disease, weakness or bad habits. Any procedure we adopt for the self-purification is all part of YAGYAS.

On different perspective it has different modes. Some one likes to do it, but some one wants the result if some one else can do for them. I can prepare my accounts, but I hire an accountant for it. I can do my mantras, but I request a priest to do for me. I can fight my court case, but I hire a lawyer for the court case. A lawyer may be intelligent and expert person, having good knowledge and experience. Same as a priest having good knowledge and experience, have helped many people, follow the proper routine to perform YAGYAS for the people.

Directly or indirectly it is a need of every individual on different perspective. What you want that you do yourself. So you want it to be done by some one. So you need to pay the service charges for the work you take from others. It is very simple matter to understand.

We go through all the procedures, have developed an idea, knowledge and talent in the particular field to help people for different purpose. There are many difficult tasks in the world that every one is not familiar, but it may be need of may people. Those who do it, they know the good and bad results and procedures to set up, because he is master. Other can't assess what is right or wrong. So, one will have to surrender on the point of sacrifice.
